

Model C144 (straight) and C144A (curved) are part of the Crystalline Series featuring the elegant all glass look. The C144 sneeze guard is used on straight counters where the C144A works on curved counters. These full service (pass over) sneeze guards are characterized by the clean look of the vertical face and 45° front shields. The maximum bay size for the family is 60 inches. The C144 has four styles of crystal clear support which meet most any full-serve needs. Multiple bays units have a continuous smooth front shield and can be combined with the model C124 self service sneeze guard to make a seamless transition from full service to self service.
